Dear team,

Congratulations to you and your team for safe, flawless and successful in time completion of DHT 2 Shutdown.

Considering huge job scope, critical activities this could be made possible with whole hearted contribution by one and all from team

Keep it up, we can achieve new milestone for all upcoming tasks & challenges, however there are scope for improvement and implementation of best practices.

It was a great team work. Well done team Gemini power, we made it possible to complete this shutdown with a very challenging Covid situation without any HSEF instances.

The way work by torqueing team is remarkable. there is no any single joint leak observe during leak test.  
Specially the continue & dedicated work done by your team leader Mr Shailesh Vadoliya for critical exchanger S112 & S104 is really appreciated.

Regards:
